INDUSTRY: [Industrial](#)

SERVICE: [New Construction](#)

SIZE: 8,720sf

LOCATION: [Bradshaw, Nebraska](#)

ARCHITECT: [Architectural Design Associates](#)

COMPLETION DATE: March 2015

This new facility provides eight apparatus bays (four per side of building) to house the district's fire and emergency equipment for quick response. The pre-engineered metal building is insulated and conditioned with radiant heat for efficiency. In addition to a 1,300 SF training/community center, the building provides a 600 SF concrete bunker as an area of refuge for support staff.
